Aussie Broadband

Your Guide to Google Nest Wifi with Aussie Broadband

Google Nest Wifi is a scalable system that creates a mesh network, which delivers a consistently strong, reliable signal.

Mesh Wi-Fi provides more coverage than a traditional router by using multiple Wi-Fi points together to create a connected system that gives you a strong signal throughout your home.

It is ideal for people experiencing Wi-Fi issues with a traditional router.
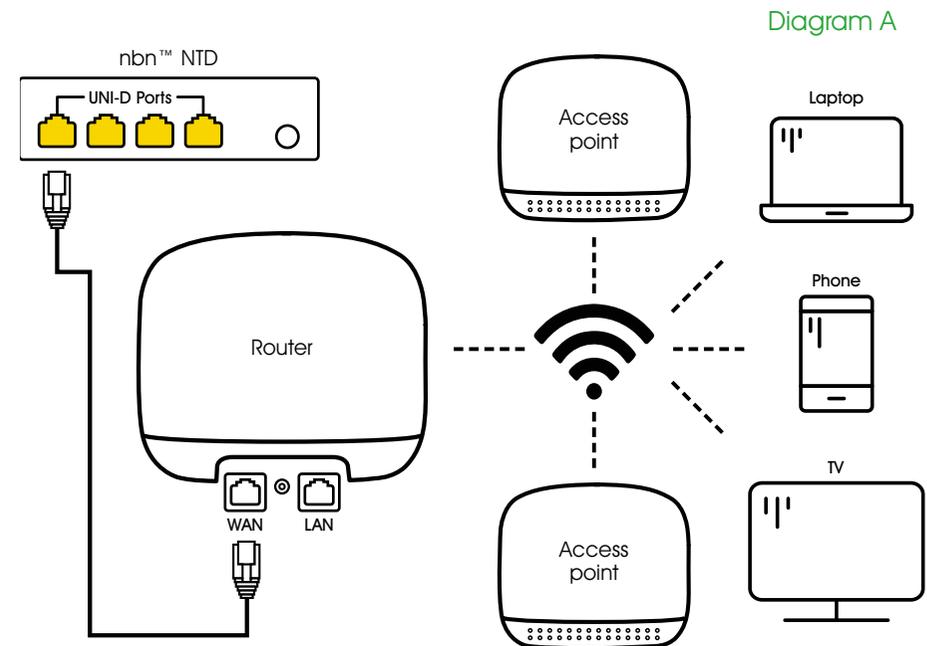

Configuring your Google Nest Wifi

1. **Download the Google Home App on Android or iOS.**
    The app guides you through the setup process step by step.

2. **Plug in your Nest Wi-Fi router.**
    The Wi-Fi router plugs into your Internet provider's modem or gateway to create your Wi-Fi network.

3. **Set up your Nest Wi-Fi point(s).**
    Plug in the Wifi point anywhere in your house that needs additional coverage. The Wifi point also doubles as a smart speaker.

4. **Enjoy your Wi-Fi.**

Connecting your Google Nest Wifi to nbn™

Diagram A

Connect your Google Router to the allocated UNI-D port on your nbn™ NTD or LAN port on your modem* with an ethernet cable as shown in the diagram above.

*Note: You only need a separate modem if you are a Fibre to the Node (FTTN) or Fibre to the Basement (FTTB) customer.

If you are an FTTN/FTTB customer refer to your "Aussie Broadband nbn™ connection guide for information on how to connect your modem.

Note - nbn™ services default to UNI-D port 1 as the allocated port. If your port number differs, please refer to your **"Welcome to Aussie Broadband!" email** for details. If you require further assistance, please reach out to our support team.

Setting up your Google Nest Wifi:

To setup your Google Nest product you will need to create a **Google Account** and download the Google Home app on an Android or iOS smart device. You will need access to an active internet connection, a smart device, access to your Google Account and the Google Home app.

If you do not already have a Google Account, you can create one at: **accounts.google.com/SignUp**

Identifying Router vs Point:

Google Nest Wifi router   **Google Nest Wifi point**

Please Note: Aussie Broadband can not get access to any of your account information from Google. Please ensure you maintain a record of your username and password.

Need Help?
Call 1300 880 905 to get assistance from our Aussie Experts.

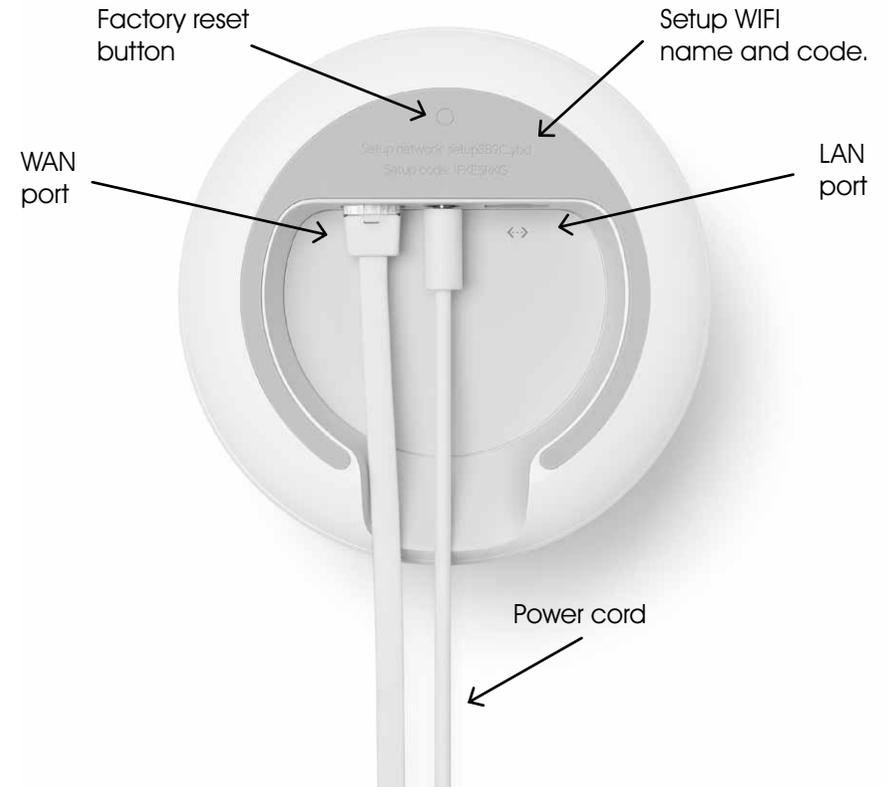

Where to run your speed test:
If you run your speed test via the Aussie Broadband server, the results automatically attach to your account so we can see a history of your speed.

You'll find the speed test at: speed.aussiebroadband.com.au
