

Hosted PBX Phones for easier communications.

Our Hosted PBX is a smart cloud based phone system that packs in features to help you make the most of your phone system.

Hosted PBX Phones

Connect your team to your customers with ease

In this fast-paced world, it's critical for your teams to be able to make, take, conference, and transfer work calls with ease – and in a way that's cost effective for your business.

With customisable features and a digital call management system in the cloud, a hosted PBX phone system is ideal to keep your team and customers connected.

An advanced cloud phone system over your nbn™

We put the 'smarts' of your phone system into powerful cloud servers to deliver your calls over the internet.

We also pair this with the latest in high quality, easy to use handsets that will save your staff time getting the right call to the right person.

Easily customisable features, high-quality voice calls, cloud simplicity and reduced costs are just some of ways your business could benefit from a hosted PBX phone system.

High quality features that make communications simple

- Yealink IP Phone (Included).
- Custom on-hold music + voice mail.
- Night switch.
- Paging, redial and do not disturb.
- Internal call function (extension to extension).
- Line hunt (+ additional hunt groups).
- Keep up to 10 existing numbers.
- Free local and national calls on each plan.
- Australian technical support from 8am - midnight, 7 days a week

Get the ultimate phone system for your business needs

A hosted PBX phone system gives you an amazing level of control and flexibility, helping you to save time and money which can be better spent growing your business.

nbn™ ready and loaded with features

nbn™ compatible with programmable features and an online call management system easily accessible in realtime.

Easy to grow with your business

Whether you're adding staff or expanding offices, build your system without expensive infrastructure upgrades or technician callouts.

Flexibility to work from any location

Move phones internally, between offices, or work from home – you're not limited to a single location with a cloud-based phone system.
